

Enerlites[®]

Low Voltage Dimmers

Upgrade your lighting control with Enerlites' Low Voltage LED Dimmers, ideal for 0-10V dimmable LEDs. When paired with LV-CAT5 and the MPP-24 Power Pack, these dimmers ensure reliable 24V power and integrate seamlessly with motion and daylight sensors for intelligent lighting adjustments.

- Input Voltage: 24 VDC maximum
- Needs power pack to work (MPP-24)
- Current Consumption: 20 mA
- Control 1 or 2 loads
