

Use the Enerlites Outdoor Receptacle Box to Charge EV's and RV's

Irvine, CA. September 28, 2022 – The Enerlites 50-amp Outdoor Receptacle Box is a heavy-duty NEMA 14-50R power outlet box.

The weatherproof box is designed to be used outdoors. This rugged, heavy-duty box features a 100% galvanized steel enclosure to protect the receptacle from long-term wear and tear caused by exposure to outdoor elements. An additional protective coating ensures it is resistant to heat and heavy impacts, as well as year-round weather conditions.

The in-use design allows the weatherproof box to be closed and locked even when a plug is inserted. While the box should be installed vertically, there are multiple options for wire feeds. The door can be padlocked to prevent power theft, and to ensure safety.

Use this 50 amp outdoor receptacle box to charge any electric vehicle on the market. It can also be used to charge RV's, campers and motorhomes.

About Enerlites

Consumer needs and evolving technology standards are the driving forces of innovation and production at Enerlites. We develop patented lighting control and wiring devices for residential, industrial, and commercial use that have high-quality energy efficiency and apply cutting-edge technology. The Enerlites team is committed to offering modern solutions that ease installation and transform spaces from merely functional to highly effective.
