

Enerlites®

DUPLEX F-TYPE CONNECTORS WALL JACK FEMALE TO FEMALE

MODEL NO: 6621

DESCRIPTION

The ENERLITES 6621 plate provides a wall-mounted connection for all F-type, 75 Ohm coaxial cables. Made of polycarbonate thermoplastic they are manufactured to provide durability, flexibility, and resilience to bending and high-impacts. They are also heat & fade resistant to temperatures over 100 degrees which protects them from fading and discoloration over time. Their smooth finish provides an attractive look and makes them easy to clean.

FEATURES

- High-impact resistant thermoplastic frame
- Combination jack and coax minimize ganging requirements
- Meets FCC part 68

SPECIFICATIONS

Type	F-Type Connector
