

Enerlites®

1-GANG PHONE/CABLE 0.406" DIA. HOLE

MODEL NO: **8661**

DESCRIPTION

ENERLITES polycarbonate thermoplastic wall plates are manufactured to provide durability, flexibility, and resilience to bending and high-impacts. They are also heat & fade resistant to temperatures over 100 degrees which protects them from fading and discoloration over time, and have a flammability rating of UL94, V2. Their smooth finish provides an attractive look and makes them easy to clean.

FEATURES

- High-impact resistant thermoplastic frame
- Meets FCC part 68
