

Enerlites®

1-GANG RECESSED MULTIMEDIA PULL-THROUGH COVER

MODEL NO: 8881

DESCRIPTION

ENERLITES polycarbonate thermoplastic wall plates are manufactured to provide durability, flexibility, and resilience to bending and high-impacts. They are also heat & fade resistant to temperatures over 100 degrees which protects them from fading and discoloration over time, and have a flammability rating of UL94, V2. Their smooth finish provides an attractive look and makes them easy to clean.

FEATURES

- Large opening for easy access
- No sharp edges
- Durable construction
- Great for installations behind TVs and entertainment centers
