

Enerlites®

2-GANG BLANK PLASTIC WALL PLATES

MODEL NO: **8802**

DESCRIPTION

ENERLITES polycarbonate thermoplastic wall plates are manufactured to provide durability, flexibility, and resilience to bending and high-impacts. They are also heat & fade resistant to temperatures over 100 degrees which protects them from fading and discoloration over time, and have a flammability rating of UL94, V2. Their smooth finish provides an attractive look and makes them easy to clean.

FEATURES

- Durable to high impacts and resilient to bending and twisting during installations
- Smooth finish without recessed lines for easy cleaning and to maintain attractive appearance
- Various colors available
