

Enerlites®

1-GANG BRISTLED ADAPTER RECESSED CABLE PLATES

MODEL NO: 8891

DESCRIPTION

The ENERLITES 8891 is designed to pass low voltage cables through a wall. The low voltage cables pass through a soft bristled material that keeps the cables in place. Made of polycarbonate thermoplastic they are manufactured to provide durability, flexibility, and resilience to bending and high-impacts. They are also heat & fade resistant to temperatures over 100 degrees which protects them from fading and discoloration over time.

FEATURES

- Large opening for easy access
- No sharp edges
- Durable construction
- Great for installations behind TVs and entertainment centers
